

Coronavirus disease (COVID-19)

Situation Report – 110

Data as received by WHO from national authorities by 10:00 CEST, 9 May 2020

This report has been reformatted to improve accessibility for persons with visual impairment.

Highlights

The Emergency Relief Coordinator/UN Under-Secretary-General for Humanitarian Affairs Mark Lowcock launched an update to the **Global Humanitarian Response Plan** for COVID-19 (GHRP). He was joined by the Executive Director of WHO's Health Emergencies Programme, Dr Mike Ryan; the President and CEO of Oxfam America, Abby Maxman; the UN High Commissioner for Refugees, Filippo Grandi; and the Executive Director of the World Food Programme, David Beasley. The GHRP has a funding requirement of US\$6.7 billion to protect millions of people already facing humanitarian crises in several countries. For more information, a **UN News Story** and **YouTube** recording is available.

New interim guidance has been released by the Inter-Agency Standing Committee on **how to adapt COVID-19 prevention and response measures for use in low capacity and humanitarian settings**.

WHO has released a **video summarising key moments in the response** so far.

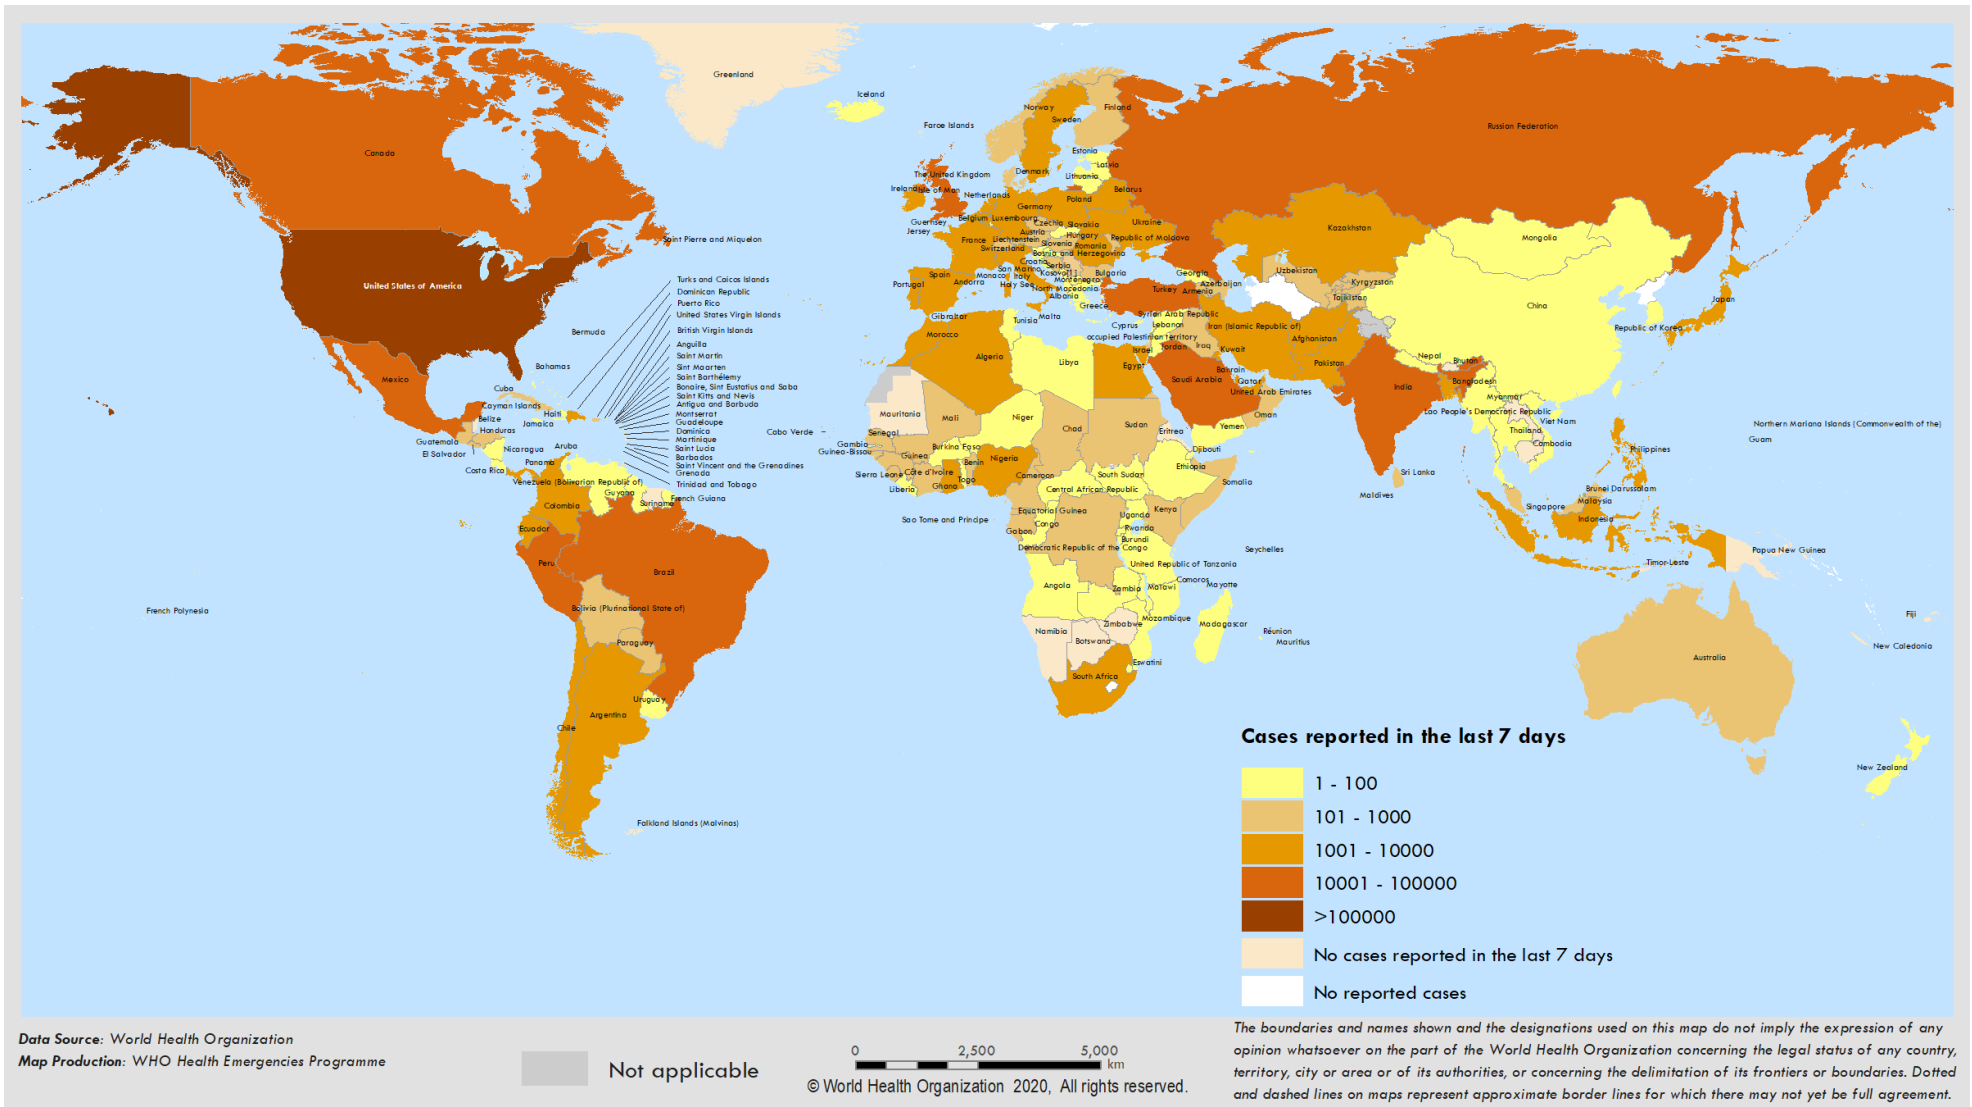

Situation in numbers (by WHO Region)

Total (new cases in last 24 hours)

Globally	3 855 812 cases (95 845)	265 862 deaths (6388)
Africa	40 568 cases (2851)	1322 deaths (47)
Americas	1 636 841 cases (50 712)	91 893 deaths (3963)
Eastern Mediterranean	246 022 cases (8699)	8748 deaths (140)
Europe	1 682 338 cases (27 993)	154 233 deaths (2054)
South-East Asia	90 808 cases (4514)	3204 deaths (129)
Western Pacific	1 585 23 cases (1076)	6449 deaths (55)

Surveillance

Figure 1. Number of confirmed COVID-19 cases reported in the last seven days by country, territory or area, 3 May to 9 May**

**See Annex 1 for data, table and figure notes.

Figure 2. Number of confirmed COVID-19 cases, by date of report and WHO region, 30 December 2019 through 9 May 2020**

**See [Annex 1](#) for data, table and figure notes.

Table 1. Countries, territories or areas with reported laboratory-confirmed COVID-19 cases and deaths, by WHO region. Data as of 10 AM CEST, 9 May 2020**

Reporting Country/ Territory/Area	Total confirmed cases	Total confirmed new cases	Total deaths	Total new deaths	Transmission classification ⁱ	Days since last reported case

Case definitions

WHO periodically updates the [Global Surveillance for human infection with coronavirus disease \(COVID-19\) document](#) which includes surveillance definitions.

Definition of COVID-19 death

COVID-19 death is defined for surveillance purposes as a death resulting from a clinically compatible illness in a probable or confirmed COVID-19 case, unless there is a clear alternative cause of death that cannot be related to COVID disease (e.g. trauma). There should be no period of complete recovery between the illness and death.

Annex 1: Data, table and figure notes

Caution must be taken when interpreting all data presented. Differences are to be expected between information products published by WHO, national public health authorities, and other sources using different inclusion criteria and different data cut-off times. While steps are taken to ensure accuracy and reliability, all data are subject to continuous verification and change. Case detection, definitions, testing strategies, reporting practice, and lag times differ between countries/territories/areas. These factors, amongst others, influence the counts presented with variable underestimation of true case and death counts, and variable delays to reflecting these data at global level.

The designations employed, and the presentation of these materials do not imply the expression of any opinion whatsoever on the part of WHO concerning the legal status of any country, territory or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement. Countries, territories and areas are arranged under the administering WHO region.

^[1] All references to Kosovo should be understood to be in the context of the United Nations Security Council resolution 1244 (1999). In the map, number of cases of Serbia and Kosovo (UNSCR 1244, 1999) have been aggregated for visualization purposes.

Counts reflect laboratory-confirmed cases and deaths, based on [WHO case definitions](#) unless stated otherwise (see *Country, territory, or area-specific updates and errata*), and include both domestic and repatriated cases.

Other*: includes cases reported under the international conveyance (Diamond Princess).

Due to the recent trend of countries conducting data reconciliation exercises which remove large numbers of cases or deaths from their total counts, WHO will now display such data as *negative* numbers in the “new cases” / “new deaths” columns as appropriate. This will aid readers in identifying when such adjustments occur. When additional details become available that allow the subtractions to be suitably apportioned to previous days, graphics will be updated accordingly. Prior situation reports will not be edited; see covid19.who.int for the most up-to-date data.

Additional table notes

ⁱ Transmission classification is based on a process of country/territory/area self-reporting. Classifications are reviewed on a weekly basis, may be revised as new information becomes available, and are based on the highest category reported. Differing degrees of transmission may be present within countries/territories/areas. Categories:

- No cases: with no confirmed cases (not shown in table).
- Sporadic cases: with one or more cases, imported or locally detected.
- Clusters of cases: experiencing cases, clustered in time, geographic location and/or by common exposures.
- Community transmission: experiencing larger outbreaks of local transmission defined through an assessment of factors including, but not limited to: large numbers of cases not linkable to transmission chains; large numbers of cases from sentinel lab surveillance; and/or multiple unrelated clusters in several areas of the country/territory/area.
- Pending: transmission classification not been reported to WHO.

ⁱⁱ “Territories” include territories, areas, overseas dependencies and other jurisdictions of similar status.

Country, territory, or area-specific updates and errata

No major updates
