

# Coronavirus disease (COVID-19)

## Situation Report – 177

Data as received by WHO from national authorities by 10:00 CEST, 15 July 2020

### Highlights

[WHO is supporting ongoing vaccination efforts during the COVID-19 pandemic](#) by providing knowledge and assistance to immunization programmes worldwide and helping countries as they balance the threat of COVID-19 with the threat of vaccine-preventable disease outbreaks and related-deaths.

Since the first confirmed case of COVID-19 in Somalia, WHO and key international partners have upgraded the country's diagnostic capacity. WHO continues to provide budgetary support for hiring staff and [strengthening the overall laboratory capacity in Somalia](#).

WHO has chronicled the work of a doctor, cultural mediator and migrant, [Dr Aref Bandary, who has been leading the COVID-19 response in refugee centers in Serbia](#).

The Director of the WHO Regional Office for the Americas, Dr Carissa F. Etienne, discusses how [countries in the Americas are pooling their efforts to ensure access to treatments and vaccines for COVID-19](#). Under [WHO's Access to COVID-19 Tools Accelerator](#), the COVAX facility will negotiate access with the producers of all COVID-19 candidate vaccines that show promising results.

Today's '[Subject in Focus](#)' provides an update on the COVID-19 Supply Chain System. In the coming weeks, nearly 201 million pieces of equipment will be shipped to 138 countries.

### Situation in numbers (by WHO Region)

Total (new cases in last 24 hours)

<b>Globally</b>	13 150 645 cases (185 836)	574 464 deaths (4 176)
<b>Africa</b>	506 124 cases (13 464)	8 650 deaths (220)
<b>Americas</b>	6 884 151 cases (103 723)	290 674 deaths (2 244)
<b>Eastern Mediterranean</b>	1 317 078 cases (14 781)	32 294 deaths (543)
<b>Europe</b>	2 964 046 cases (17 942)	204 449 deaths (492)
<b>South-East Asia</b>	1 231 014 cases (34 363)	30 570 deaths (670)
<b>Western Pacific</b>	247 491 cases (1 563)	7 814 deaths (7)

## Subject in Focus: COVID-19 Supply Chain System – Progress Update

With the resumption of commercial flights and air travel, WHO, through the COVID-19 Supply Chain System, has reported increased deliveries of critical medical supplies for the COVID-19 response to countries facing the greatest need. These supplies include personal protective equipment (PPE), diagnostics and biomedical equipment.

### Personal Protective Equipment

Working with the World Food Programme (WFP), which is running warehouse and transport operations for the COVID-19 Supply Chain System, WHO has increased deliveries of PPE – including medical masks, respirator masks, goggles, face shields, gowns and gloves - from 5.5 million to 50.4 million pieces over the past month.

Moving forward, nearly 201 million pieces of PPE will be shipped to 138 countries across all six WHO regions. These numbers include 100 million medical masks and 1 million respirator masks donated by the Jack Ma Foundation.

Nearly 20 million pieces of PPE have now been shipped to the Region of the Americas, currently the epicenter of the COVID-19 pandemic. A further 70 million pieces of PPE will be shipped over the coming weeks.

WHO is now prioritizing the shipment of 46.4 million pieces of PPE to 52 countries in Africa over the coming weeks.

An additional 200M units of PPE are being prepared in warehouse to be shipped in the coming weeks

## Diagnosics

Through the diagnostics purchasing consortium, WHO, UNICEF and the Global Fund have procured close to 6 million polymerase chain reaction (PCR) tests and 5.2 million sample collection kits from a number of manufacturers to increase testing capacity in countries.

To date, 3.1 million PCR tests and 1.7 sample collection kits have been shipped to 137 countries across all WHO regions.

## Bio-medical Equipment

Approximately US\$19 million of bio-medical equipment – comprising 14 000 oxygen concentrators, 9 700 pulse oximeters and 4 700 patient monitors – have been purchased through the Clinical Care Consortium.

Of WHO's initial purchase of 4 000 oxygen concentrators, 3 950 concentrators have been shipped to 36 countries that have had the greatest difficulty accessing these life-saving supplies for COVID-19 patients in critical condition. An additional 10 000 oxygen concentrators were purchased in June and will be prepared for shipment upon arrival to the WFP warehouse in China.

## COVID-19 Supply Portal

Since the launch of the COVID-19 Supply Portal, 81 countries have submitted 351 requests for supplies with a total estimated value of US\$ 174.6 million.

# Surveillance

Figure 1. Number of confirmed COVID-19 cases reported in the last seven days by country, territory or area, 9 July to 15 July \*\*

\*\*See [Annex 1](#) for data, table and figure notes.

Figure 2. Number of confirmed COVID-19 cases, by date of report and WHO region, 30 December through 15 July\*\*

\*\*See [Annex 1](#) for data, table and figure notes.

Table 1. Countries, territories or areas with reported laboratory-confirmed COVID-19 cases and deaths, by WHO region. Data as of 10 AM CEST, 15 July 2020\*\*

## Case definitions

WHO periodically updates the [Global Surveillance for human infection with coronavirus disease \(COVID-19\)](#) document which includes surveillance definitions.

### Definition of COVID-19 death

A COVID-19 death is defined for surveillance purposes as a death resulting from a clinically compatible illness in a probable or confirmed COVID-19 case, unless there is a clear alternative cause of death that cannot be related to COVID-19 disease (e.g. trauma). There should be no period of complete recovery between the illness and death.

Further guidance for certification and classification (coding) of COVID-19 as cause of death is available [here](#) and [here](#).

---

## Annex 1: Data, table and figure notes

Caution must be taken when interpreting all data presented. Differences are to be expected between information products published by WHO, national public health authorities, and other sources using different inclusion criteria and different data cut-off times. While steps are taken to ensure accuracy and reliability, all data are subject to continuous verification and change. Case detection, definitions, testing strategies, reporting practice, and lag times differ between countries/territories/areas. These factors, amongst others, influence the counts presented, with variable underestimation of true case and death counts, and variable delays to reflecting these data at global level.

The designations employed, and the presentation of these materials do not imply the expression of any opinion whatsoever on the part of WHO concerning the legal status of any country, territory or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement. Countries, territories and areas are arranged under the administering WHO region.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by WHO in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

[1] All references to Kosovo should be understood to be in the context of the United Nations Security Council resolution 1244 (1999). In the map, number of cases of Serbia and Kosovo (UNSCR 1244, 1999) have been aggregated for visualization purposes.

Counts reflect laboratory-confirmed cases and deaths, based on [WHO case definitions](#), unless stated otherwise (see Country, territory, or area-specific updates and errata), and include both domestic and repatriated cases.

Other\*: includes cases reported from international conveyances.

Due to the recent trend of countries conducting data reconciliation exercises which remove large numbers of cases or deaths from their total counts, WHO will now display such data as negative numbers in the "new cases" / "new deaths" columns as appropriate. This will aid readers in identifying when such adjustments occur. When additional details become available that allow the subtractions to be suitably apportioned to previous days, graphics will be updated accordingly. Prior situation reports will not be edited; see [covid19.who.int](https://covid19.who.int) for the most up-to-date data.

## **Additional table notes**

<sup>i</sup> Transmission classification is based on a process of country/territory/area self-reporting. Classifications are reviewed on a weekly basis and may be revised as new information becomes available. Differing degrees of transmission may be present within countries/territories/areas; classification is based on the highest category reported within a country/territory/area. Categories:

- No cases: with no confirmed cases;
- Sporadic cases: with one or more cases, imported or locally detected;
- Clusters of cases: experiencing cases, clustered in time, geographic location and/or by common exposures;
- Community transmission: experiencing larger outbreaks of local transmission defined through an assessment of factors including, but not limited to: large numbers of cases not linkable to transmission chains; large numbers of cases from sentinel lab surveillance; and/or multiple unrelated clusters in several areas of the country/territory/area;
- Pending: transmission classification has not been reported to WHO.

ii "Territories" include territories, areas, overseas dependencies and other jurisdictions of similar status.
