

Coronavirus disease (COVID-19)

Situation Report – 103

Data as received by WHO from national authorities by 10:00 CEST, 2 May 2020

This report has been reformatted to improve accessibility for persons with visual impairment.

Highlights

No new country/territory/area reported cases of COVID-19 in the past 24 hours.

WHO and the European Investment Bank yesterday signed a collaboration agreement to accelerate investment in health preparedness and primary healthcare in countries most vulnerable to the COVID-19 pandemic. The first phase will strengthen primary healthcare in ten African countries. The Director-General Dr. Tedros, in his regular **media briefing** yesterday said that, with the signing of the agreement, “We are deepening our relationship with the European Union”. He also reminded all that the European Commission will host a pledging conference on 4 May to raise funds for investment in vaccine research.

Situation in numbers (by WHO Region)

Total (new cases in last 24 hours)

Globally	3 267 184 cases (91 977)	229 971 deaths (5799)
Africa	27 973 cases (1310)	1013 deaths (40)
Americas	1 340 591 cases (48 674)	72 196 deaths (3109)
Eastern Mediterranean	194 991 cases (6406)	7741 deaths (143)
Europe	1 492 024 cases (30 620)	140 586 deaths (2386)
South-East Asia	60 490 cases (3402)	2256 deaths (82)
Western Pacific	150 403 cases (1565)	6166 deaths (39)

Surveillance

Figure 1. Number of confirmed COVID-19 cases reported in the last seven days by country, territory or area, 25 April to 2 May**

Data Source: World Health Organization
Map Production: WHO Health Emergencies Programme

Case definitions

WHO periodically updates the [Global Surveillance for human infection with coronavirus disease \(COVID-19\) document](#) which includes surveillance definitions.

Definition of COVID-19 death

COVID-19 death is defined for surveillance purposes as a death resulting from a clinically compatible illness in a probable or confirmed COVID-19 case, unless there is a clear alternative cause of death that cannot be related to COVID disease (e.g. trauma). There should be no period of complete recovery between the illness and death.

Annex 1: Data, table and figure notes

Caution must be taken when interpreting all data presented. Differences are to be expected between information products published by WHO, national public health authorities, and other sources using different inclusion criteria and different data cut-off times. While steps are taken to ensure accuracy and reliability, all data are subject to continuous verification and change. Case detection, definitions, testing strategies, reporting practice, and lag times differ between countries/territories/areas. These factors, amongst others, influence the counts presented with variable underestimation of true case and death counts, and variable delays to reflecting these data at global level.

The designations employed, and the presentation of these materials do not imply the expression of any opinion whatsoever on the part of WHO concerning the legal status of any country, territory or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement. Countries, territories and areas are arranged under the administering WHO region.

^[1] All references to Kosovo should be understood to be in the context of the United Nations Security Council resolution 1244 (1999).

In the map, number of cases of Serbia and Kosovo (UNSCR 1244, 1999) have been aggregated for visualization purposes.

Counts reflect laboratory-confirmed cases and deaths, based on [WHO case definitions](#) unless stated otherwise (see *Country, territory, or area-specific updates and errata*), and include both domestic and repatriated cases.

Other*: includes cases and deaths reported under the international conveyance (Diamond Princess).

Additional table notes

ⁱ Transmission classification is based on a process of country/territory/area self-reporting. Classifications are reviewed on a weekly basis, may be revised as new information becomes available, and are based on the highest category reported. Differing degrees of transmission may be present within countries/territories/areas. Categories:

- No cases: with no confirmed cases (not shown in table).
- Sporadic cases: with one or more cases, imported or locally detected.
- Clusters of cases: experiencing cases, clustered in time, geographic location and/or by common exposures.
- Community transmission: experiencing larger outbreaks of local transmission defined through an assessment of factors including, but not limited to: large numbers of cases not linkable to transmission chains; large numbers of cases from sentinel lab surveillance; and/or multiple unrelated clusters in several areas of the country/territory/area.
- Pending: transmission classification not been reported to WHO.

ⁱⁱ "Territories" include territories, areas, overseas dependencies and other jurisdictions of similar status.
